PROFESSIONAL SUMMARY

Full Stack Engineer with 3 years of experience building scalable web and multi-platform applications using Spring Boot, Node.js, and Angular. Strong background in microservices architecture, REST APIs, and real-time systems (Socket.io). Experienced in delivering high-performance solutions and leading technical projects in agile environments.

PROFESSIONAL EXPERIENCE

CME Electronic — Full Stack Developer & Intern

(October 2022 – November 2025)

- **Final Year Engineering Intern (Thesis Project)** (May 2025 – November 2025)
 - Developed a real-time route calculation and pricing system
 - Implemented real-time features using Socket.io
 - Built multi-platform applications (web, mobile, desktop)
 - Designed backend architecture using Express.js
- **Full Stack Developer & Project Manager** (October 2022 – September 2025)
 - Developed scalable full-stack applications using Spring Boot and Angular
 - Designed and integrated REST APIs
 - Designed scalable backend architecture for real-time applications
 - Coordinated technical tasks and project delivery
- **Engineering Intern** (July 2024 – September 2024)
 - Developed an access control system
 - Implemented user management and authorization
- Continued collaboration with the company as part of final year engineering thesis

ESPRIT – Summer Internship

(August 2023)

- Developed a web platform for managing international academic mobility programs
- Designed and implemented features for application and exchange workflows
- Contributed to backend integration and database management
- **Tech stack:** Symfony 5, MySQL

Animal Nutrition Company (SNA) – Final Year Internship

(January 2022 – May 2022)

- Implemented a **network monitoring solution** to track system performance and availability
- Analyzed system metrics and improved reliability through monitoring tools
- **Tech stack:** Zabbix, GNS3, Linux

Ciments de Bizerte – End-of-Year Internship

(August 2021)

- Developed a web platform for internship management
- Designed user interfaces and handled data processing
- **Tech stack:** HTML5, CSS, JavaScript, PHP

ACADEMIC PROJECTS

Microservices Project – E-Learning Platform « LMS »

(September 2024 – November 2024)

- Designed and developed a scalable E-Learning platform using **microservices architecture**
- Built independent services for **user, course, and content management**
- Implemented **API Gateway** and service discovery using **Eureka**
- Containerized and deployed services with **Docker** to ensure scalability
- **Tech stack:** Spring Boot, Microservices, MongoDB, Express.js, Docker, API Gateway, Eureka

Web Project – E-Learning Platform « Courzelo »

(January 2024 – May 2024)

- Developed a web platform for managing courses and student activities
- Integrated **frontend and backend** with secure user management features
- Designed an application architecture using **Spring and Angular**
- **Tech stack:** Spring, Angular, Django, NoSQL

Multi-Platform Project – Farm Management Platform « AgroEasy »

(January 2023 – May 2023)

- Designed and developed a **multi-platform application (web, mobile, desktop)**
- Implemented features for **inventory, crops, and livestock** management
- Built user interfaces and handled data processing across platforms
- **Tech stack:** Symfony 5, JavaFX, Codename One, MySQL

EDUCATION

Philipps-Universität Marburg, Germany

(October 2025 – September 2026)

Exchange Student – Computer Science

ESPRIT School of Engineering, Ariana

(September 2022 – December 2025)

Engineering Degree in Software Architecture

Higher Institute of Information and Communication Technologies

(September 2018 – May 2022)

Bachelor's Degree in Telecommunications

Lycée Bach Hamba

(September 2012 – June 2018)

High School Diploma in Mathematics

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript, Python
- **Backend:** Spring Boot, Node.js (Express.js), Symfony
- **Frontend:** Angular, React Native
- **Databases:** MySQL, MongoDB
- **Architecture:** Microservices, REST APIs, Real-time systems (Socket.io)
- **DevOps & Tools:** Docker, Git, Linux, Jenkins, SonarQube, Nexus
- **Libraries & Utilities:** Lombok
- **Methodologies:** Agile, Scrum
